# PRODUCTION CAPABILITY

### **RAW MATERIALS**

Using 100% biodegradable biomass plant fibre as the raw material ensures a high-quality product, which is the first step in the quality control process.

Using an internationally recognised closed-loop material system guarantees zero environmental residue throughout the product's life cycle.

Raw Material	Core Strengths	Environmental Benefits		
Sugarcane	Converting waste from the sugar industry into high-strength fibres.	Soil degradation cycle ≤ 90 days		
FSC® Wood Pulp	Responsible forest management system(FSC-C074521)	The forest regeneration rate is higher than the logging rate.		
Recycled Fibre	16-step purification process (FDA certified)	One tonne of recycled paper reduces CO <sub>2</sub> emissions by 1.4 tonnes.		
Bamboo Pulp	Short growth cycle and sustainable resources	Bamboo forests absorb 30% more carbon dioxide per unit area than forest.		

### **MANUFACTURING**

- · Over 500 pieces of equipment to meet product customisation needs.
- · Strict quality control and assurance processes, with comprehensive quality management throughout the entire production process.
- · All products are marked with batch numbers for traceability management and data analysis.

ATLANTIC OCEAN

# OUR SERVICE

Lopie provides integrated solutions of foodservice and Jan&San disposable paper products to global customers.

## LOGISTICS

Lopie warehouses are strategically located in Guigang, Dongguan, and Penang, Malaysia, offering consolidation and logistics services to our global customers. We provide comprehensive logistics solutions, including port of departure services, shipping schedule selection, end-to-end tracking, and destination support. Our one-stop service ensures seamless production, transportation, and delivery. With an experienced logistics team managing customs clearance and real-time logistics information, we guarantee a smooth and efficient supply chain.

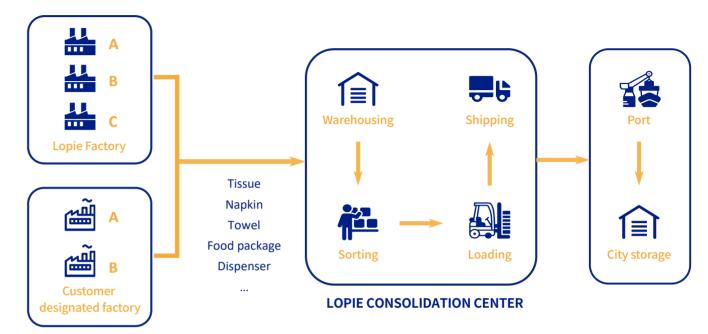

## WAREHOUSING & CONSOLIDATION

The Guigang Lopie base features five warehouses, 24 container loading docks, and raw paper loading platforms, covering a total storage area of over 50,000 square meters. We offer efficient warehousing and consolidation services to streamline distribution and reduce storage and logistics costs. Our dedicated and experienced team ensures that premium products are shipped to your warehouse accurately and on time.

### PRODUCT SUPPLIER

Lopie has established a robust quality control system that meticulously monitors every stage of production, from raw materials to finished products. This ensures we deliver safe, high-quality products that meet and exceed customer expectations.

# SUSTAINABLE DEVELOPMENT

Plastic pollution is sweeping across the globe, and disposable products have become a heavy burden on the environment. Lopie takes "transmitting and sharing the quality of life" as its mission, advocates the environmental protection concept of "respecting life and protecting the earth", actively practices the scientific concept of development, and strives to achieve the business purpose of win-win cooperation. Lopie always supports the protection of forests and the ecological environment, and uses tree-free materials such as sugarcane, reed, and waste paper to produce finished products to achieve sustainable development.

### RAW MATERIALS

Lopie has always supported the protection of forests and the ecological environment. Its products are made from sugarcane pulp, wood pulp, and recycled environmentally friendly materials, and are biodegradable, compostable, and non-polluting. Every product is made from FSC-certified virgin pulp, with 0 fluorescent agents and 0 bleaching agents. Lopie's products have several certifications, including industrial composting certification and home composting certification, to ensure that our products are designed with the environment in mind.

### FACTORY

We already got the Organizational Greenhouse Gas Verification Statement. Further action will be made later for the rest stages/phases.

- · Medium and Long-term Development Plan
- · Establishment of scientific carbon target (SBTi)
- · Zero Carbon Factory Achievement Certification

### SOLAR-PANEL SYSTEM

### **OUR TEAM**

We have more than 2,000 employees and an excellent team based in China and serving clients around the world. They are a group of serious, rigorous and meticulous people who are here to serve you.

"At Lopie, our vision is to bring together a group of like-minded individuals who are idealistic, responsible and committed to collaborating with those in power to build a great enterprise. We aim to provide green, environmentally friendly products through innovative, energy-efficient methods while upholding the values of warmth, vitality, trustworthiness, respectability and excellence. It provides comprehensive services to customers around the world and, more importantly, exports the spirit of a gentleman to the world."-LOPIE CEO Tiger

## TAD Towel Products (Through Air Drying)

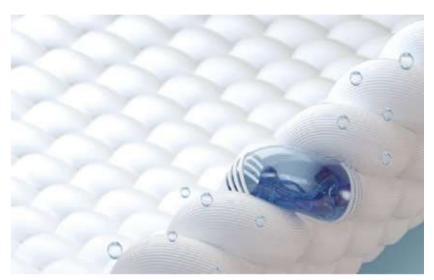

TAD technology removes water during production by pulling high temperature air through the sheet. By using air, paper manufacturers are able to maintain the fiber thickness and provide up to twice the bulk and absorption capacity for the same basis weight. TAD only uses virgin fibers providing a premium, softer product. With an emboss formed during the process, TAD provides users with a product ideal for cleaning

spills, wiping down surfaces and hand drying.

Compared with traditional regular paper hand towel, TAD is bulky, softer and stronger absorbency, and the GSM is lower than regular paper. It feels like cloth not paper, without any spices. Strong and absorbent for efficient hand-drying after washing hands. Only need to pull out one piece every time and don't need to wait. Widely used in some High-end public places such as Golf Course, Five star hotel, Casino, Private club, Airport and so on. No any paper bits left on skin after using. Degradable, Insoluble in water, don't throw it to sewer.

Through-Air Drum Drier Features Diagonally Offset Drums to increase Drying Area.

## **Roll Wiper**

This is the new alternative to wipers, light-duty cleaning and wiping applications. ideal for front and back-of-the-house applications. that is super absorbent and reusable for less! These cloths have a soft surface and can absorb 4 times their weight in liquid, making them great for soaking up spills and cleaning up messes. It can be used with detergents to clean, sanitize and reuse. Color towel options aid in prevention of cross-contamina \( \Pi \) tion by keeping cleaning functions separate and distinct.

MATERIAL	GSM	W(CM)	L(CM)	SHEETS/PCS
