Towel

Provide a clean and hygienic hand drying experience.

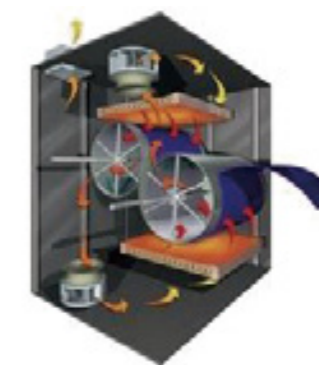

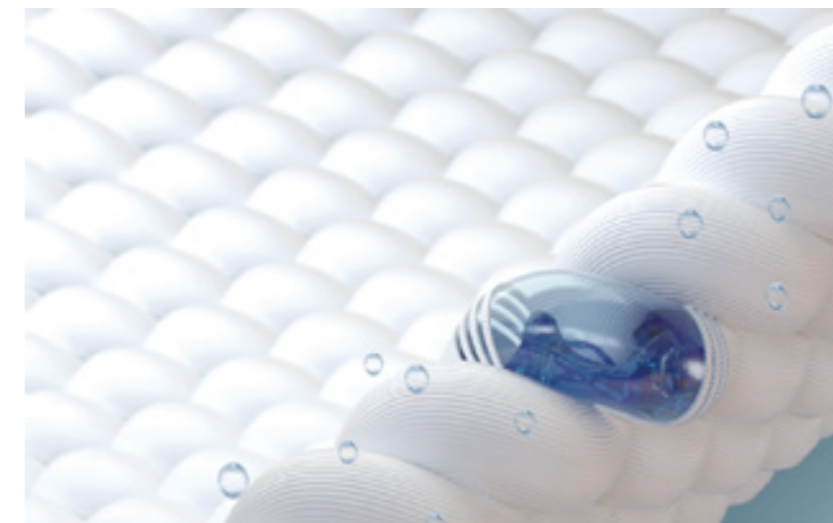

TAD Towel Products (Through Air Drying)

TAD technology removes water during production by pulling high temperature air through the sheet. By using air, paper manufacturers are able to maintain the fiber thickness and provide up to twice the bulk and absorption capacity for the same basis weight. TAD only uses virgin fibers providing a premium, softer product. With an emboss formed during the process, TAD provides users with a product ideal for cleaning spills, wiping down surfaces and hand drying.

Compared with traditional regular paper hand towel, TAD is bulky, softer and stronger absorbency, and the GSM is lower than regular paper. It feels like cloth not paper, without any splices. Strong and absorbent for efficient hand-drying after washing hands. Only need to pull out one piece every time and don't need to wait. Widely used in some High-end public places such as Golf Course, Five star hotel, Casino, Private club, Airport and so on. No any paper bits left on skin after using. Degradable, Insoluble in water, don't throw it to sewer.

Through-Air Drum Drier Features Diagonally Offset Drums to Increase Drying Area.

Our economical Centre Pull Towel is soft, strong and absorbent enough to tackle a wide range of wiping tasks involving both hands and surfaces.

Strong wettability, paper is tough and not easy to break.
Use with dispenser to avoid paper contamination.

Made from 100% virgin or recycled paper. These Kitchen Roll Towel are also fully compostable, recyclable and bleach free.

The exam table paper is used as a disposable hygiene product. It can effectively prevent cross-infection, ensure hygiene and safety during use, and has a soft and skin-friendly surface. Even after long-term use, it won't cause discomfort. Although the disposable exam table paper is a one-time product, it is usually made of degradable materials and is designed to be convenient and environmentally friendly.

This is the new alternative to wipers, light-duty cleaning and wiping applications. Ideal for front and back-of-the-house applications, that is super absorbent and reusable for less! These cloths have a soft surface and can absorb 4 times their weight in liquid, making them great for soaking up spills and cleaning up messes. It can be used with detergents to clean, sanitize and reuse. Color towel options aid in prevention of cross-contamination by keeping cleaning functions separate and distinct.

Soup Cup is suitable for hot food packing scenarios, commonly used for soup, porridge and other food containers, made of food-grade cardboard, with environmental concept, environmentally friendly and biodegradable. Support printing customization. The corresponding lids are available in PP plastic and paper, suitable for different food packaging occasions.

Made of food-grade cardboard, suitable for large-capacity food packaging, a variety of sizes to choose from, can do customized printing.

Made of food-grade paper, lightweight, environmentally friendly, single-use features, designed with good compression resistance and not easy to deform. Widely used in food packaging and food service. Lids are available in PET/PP and cardboard materials, suitable for different food packaging scenarios
